PROFILE

As a full-stack Developer with a solid year of experience as an intern, I specialize in developing scalable, high-performance applications using **ASP.NET Core, C#, Web API, Angular,** and **SQL**. I am particularly focused on performance and maintainability, ensuring that applications are not only functional but also efficient and sustainable in the long term

WORK EXPERIENCE

■ **Aitrich Technologies | [Thrissur] | [Present]**
Full-Stack Developer Intern

- Contributed to the development of scalable applications using Angular, ASP.NET Core, Web API, and SQL, focusing on both performance optimization and maintainability.
- Actively participated in the Software Development Life Cycle (SDLC), from requirements gathering to backlog creation and sprint planning, following the Agile-Scrum methodology.
- Designed and implemented MVC architecture, ensuring a clean separation of concerns and enhancing the maintainability and scalability of back-end systems.
- Developed and optimized RESTful APIs, ensuring seamless communication between front-end and back-end components, improving data exchange efficiency.
- Led daily stand-ups and sprint planning sessions, collaborating with the team to ensure alignment with project timelines, objectives, and continuous improvement.

LIBRARIES AND FRAMEWORKS

Back-End Technologies	Front-End Technologies	Collaboration Tools
• ASP.NET Core	• Angular JS	• Figma
• ASP.NET MVC	• HTML5	• Trello
• ASP.NET Web API	• CSS	• Git, GitHub
• Entity Framework	• Bootstrap	• SQL Server, SQL
• Razor Pages	• Responsive Web Design	• Draw.io
• C#		

PROJECT ("hire me"- a job portal system)

Technologies Used: ASP.NET Core, Angular, SQL Server, Entity Framework Core, JWT Authentication

- Developed a full-stack job portal with Angular frontend, ASP.NET Core backend, and SQL Server database using Entity Framework Core for ORM.
- Implemented role-based features for job seekers, job providers, and administrators with secure data handling and efficient performance.
- Secured APIs with JWT authentication, ensuring safe user logins and protecting sensitive endpoints.
- Applied data validation and authorization to improve security and ensure proper access control.
